

BE80410 / BE80411 Bering Optics Tactical Side Mounts

Shown with Night Probe

Shown with D-950 NV Attachment

PRODUCT OVERVIEW

The Bering Optical Side Mount adaptors allow mounting night vision attachments onto the rifle in-line with daytime tactical scopes that have a hood design not compatible with a standard clip-on mounting systems, designed for cylindrical shapes. The side mount has adjustment mechanisms to move the NV attachment upward and downward, and along the mounting rail to achieve the most optimal position in front of the daytime scope.

BE80410 Compatible with **Night Probe** NV Attachment
(BE26040, BE26041, BE26042)
